## **WE FEEL YOUR PAIN – HOLDING PRICES AS LONG AS WE CAN!!!**

We are trying very hard to keep our prices at 2007 levels, despite sky-rocketing gas and food costs. We want to keep our loyal clients coming back and also make sure that we can keep our wonderful staff working throughout the season. However, we still intend to maintain our high standards. We hope this will enable you and your family and/or friends to be able to take some time off and join us for some great fun.

We are proud to be celebrating our 30th year of safe operations in 2008. We may not be the biggest, but we do have a wide range of rafting trips available, catering to children from 4 years, but also offering some of the wildest rivers in California. From express ½ day fun runs, to 2-5 days for a real vacation. Many of our river guides have worked for us for years, and we are glad to be able to satisfy your requests for the same guides each season. If you have not rafted with us before, we look forward to making you one of our repeat customers.

We have added additional dates for our Family Special rafting trips, where children raft at ½ price with a full paying adult. Our group rates are also very generous, with discounts starting with just 6 people. so sign up your family and friends!! Check out great off-season discounts in May and after Labor Day Sunday. Extra special rates are available on occasions - see **News & HOT DEALS** button on left top of any website page.

We offer some of the most reliable rivers in California, with trips that run from April through September and some even into October. The FERC re-licensing of the South Fork American gives us GUARANTEED flows for the first time ever even in critically dry years.

In 2008, we are also committed to expanding and improving our emphasis on “greening” our operations. We have always been very environmentally conscious. The new brochure is printed on recycled paper and vegetable inks and we offer an online version you can browse. We also purchase the highest recycled content for all our office paper and envelope needs, and we re-cycle and re-use whenever possible. Our coffee is fair trade, shade grown and organic! We are looking at improving these efforts by utilizing using bio-fuels and vegetable oils in our vehicle fleet, carbon offsets and investigating other new ideas. As this is an evolving science, check our website for updates about our progress. We appreciate your comments and suggestions.

---
